

TABLE OF CONTENTS

Dedication	iii
Foreword	iv
Acknowledgments	v
About the Author	vi
Accessing Tutorial Files	vii
Free Teaching Resources for Faculty	vii
Dimension Units and Dialog Box Captures	viii
Preface	ix
Table of Contents	xi
Chapter 1 - Introduction to Autodesk Advance Steel	
Autodesk Advance Steel	1-2
Autodesk Advance Steel Workflow	1-4
Autodesk Advance Steel Interface	1-5
Other Autodesk Advance Steel Palettes	1-8
Understanding the Folder Structure	1-11
The User Coordinate System (UCS)	1-11
Changing Viewpoints and Visual Styles	1-12
Navigating through the Model	1-14
Invoking the Advance Steel Tools	1-14
Home Ribbon Tab vs Other Ribbon Tabs	1-15
Locating Points in the Drawing Window	1-15
Selecting Objects	1-16
Grip Editing	1-17
Use of Layers in Advance Steel	1-18
Creating and Editing Auxiliary Objects	1-18
Creating and Editing Grids	1-18
Inserting Concrete Objects	1-25
Inserting Concrete Beam	1-26
Inserting Concrete Column	1-36
Inserting Isolated Footing	1-36
Inserting Continuous Footing	1-38
Inserting Wall	1-38
Inserting Polygonal Wall	1-39
Inserting Curved Concrete Beam	1-40
Inserting Rectangular Slab	1-40
Inserting Polygonal Slab	1-41
Editing Concrete Sections	1-41
Hands-On Tutorial (Structure)	1-42
Hands-On Tutorial (BIM)	1-58
Skill Evaluation	1-73
Class Test Questions	1-74

Chapter 2 - Inserting and Editing Structural Sections

Inserting Straight Structural Sections	2-2
Inserting Rolled I-sections	2-2
Inserting Channel Sections	2-13
Inserting Angle Sections	2-13
Inserting T Sections	2-13
Inserting Circular Hollow Sections (CHS)	2-14
Inserting Z-Steel Sections	2-14
Inserting Flat Sections	2-14
Inserting Round Bar Sections	2-14
Inserting Square/Rectangular Hollow Sections (RHS/SHS)	2-14
Inserting Cold Rolled Sections	2-15
Inserting Other Sections	2-15
Inserting Curved Structural Sections	2-15
Inserting Structural Sections on Lines, Arcs, or Polylines	2-16
Inserting Structural Sections on Lines or Arcs	2-16
Inserting Structural Sections on Polylines	2-17
Inserting Columns	2-18
Inserting Continuous Structural Sections	2-19
Editing Inserted Structural Sections	2-19
Splitting and Merging Structural Sections	2-19
Splitting Structural Sections	2-19
Merging Structural Sections	2-20
Matching Properties of Sections	2-20
Working with Levels	2-21
Creating Levels	2-22
Hands-On Tutorial (Struc)	2-25
Hands-On Tutorial (BIM)	2-50
Skill Evaluation	2-71
Class Test Questions	2-72

Chapter 3 - Advanced Structural Elements - I

Advanced Structural Elements	3-2
Inserting Portal/Gable Frames	3-2
Inserting Mono-Pitch Frames	3-10
Editing Portal/Gable/Mono-Pitch Frames	3-11
Inserting Purlins	3-12
Inserting Trusses	3-21
Hands-On Tutorial (Struc/BIM)	3-35
Skill Evaluation	3-49
Class Test Questions	3-50

Chapter 4 - Inserting the Plates at Beam and Column - Beam Joints

The Connection Vault Palette	4-2
Inserting the Plates at Beam Joints	4-3
Base plate Joint	4-3
Tube base plate Joint	4-23

Corner base plate Joint	4-23
Base plate cut Joint	4-23
Inserting the Column-Beam Joints	4-24
Knee of frame bolted, with haunch Joint	4-25
Knee of frame at web, with haunch Joint	4-36
Gable wall end plate Joint	4-36
Adding Joints to the Favorites Category	4-37
Editing Joints	4-37
Propagating Joints (NEW)	4-38
Copying Joints with Master-Slave Relationship	4-39
Upgrading Joint to the Primary Connection	4-40
Adding or Removing Joints from the Joint Group	4-41
Hands-On Tutorial (Struc/BIM)	4-42
Skill Evaluation	4-71
Class Test Questions	4-72

Chapter 5 - Inserting the Beam End to End, Platform Beam, and Purlin Joints

Inserting the Beam End to End Joints	5-2
Apex haunch Joint	5-2
Double apex haunch Joint	5-3
Front plate splice Joint	5-4
Inserting the Platform Beams Joints	5-6
Clip angle Joint	5-6
Clip angle - Skewed Joint	5-13
Double side clip angle Joint	5-13
Single side end plate Joint	5-14
Double side end plate with safety bolt Joint	5-15
Shear plate Joint	5-15
Inserting the Purlins and Cold Rolled Joints	5-17
Purlin connection Joint	5-18
Purlin connection with plate Joint	5-19
Single purlin plate Joint	5-20
Double purlin splice plate Joint	5-21
Single Eaves Beam Bracket from Plate with End Plate Joint	5-21
Double Eaves Beam Bracket from Plate with End Plate Joint	5-22
Hands-On Tutorial (Struc/BIM)	5-23
Skill Evaluation	5-71
Class Test Questions	5-72

Chapter 6 - Advanced Structural Elements - II

Advanced Structural Elements	6-2
Inserting Bracings	6-2
Inserting Joists	6-8
Inserting Straight Stairs	6-14
Inserting Hand-Railings	6-28
Inserting Monowills	6-38

Inserting Penalized Monowills	6-42
Hands-On Tutorial (Struc/BIM)	6-44
Skill Evaluation	6-77
Class Test Questions	6-78

Chapter 7 - Inserting the Bracing, Tube, and Stair Joints

Inserting the General Bracing Joints	7-2
Gusset plate to column and base plate Joint	7-2
Gusset plate at one diagonal Joint	7-10
Gusset plate for 2 diagonals Joint	7-10
Four diagonals - Middle gusset plate Joint	7-11
Inserting Tube Joints	7-11
Tube connection with sandwich plate - additional objects Joint	7-11
Tube connection with sandwich plates Joint	7-16
Tube connection with sandwich plates - 2 diagonals Joint	7-17
Inserting Miscellaneous Joints	7-17
Stair Anchor Base Plate Joint	7-17
Stair Anchor Angle Joint	7-21
Railing joint handrail Joint	7-21
Hands-On Tutorial (Struc/BIM)	7-23
Skill Evaluation	7-51
Class Test Questions	7-52

Chapter 8 - Inserting Plates and Gratings, and Controlling the Object Visibility

Use of Plates in Advance Steel	8-2
Creating Flat Plates	8-2
Creating a Rectangular Plate by Specifying its Center Point	8-2
Creating a Rectangular Plate by Specifying Two Corner Points	8-3
Creating a Rectangular Plate by Specifying Three Corner Points	8-3
Creating a Polygonal Plate	8-4
Creating a Plate using a Polyline	8-4
Creating a Polyline using a Plate	8-5
Creating Folded Plates	8-5
Creating a Folded Plate Without Position Adjustment	8-6
Creating a Folded Plate With Position Adjustment	8-7
Creating a Conical Folded Plate	8-9
Creating a Twisted Folded Plate	8-10
Creating a Circular Plate at the Origin	8-11
Checking the Plate Unfolding	8-12
Setting the Folded Plate Main Object	8-13
Editing Flat and Folded Plates	8-14
Splitting a Plate Using Two Points	8-14
Splitting a Plate Using a Line	8-14
Merging Plates	8-15
Shrinking and Expanding Poly Plates	8-15

Inserting Gratings	8-16
Inserting a Standard Grating	8-16
Inserting a Rectangular Variable Grating	8-17
Inserting a Bar Grating	8-17
Inserting a Polygonal Variable Grating	8-17
Inserting a Grating at a Polyline	8-18
Creating Plate and Grating Features	8-18
Rectangular contour, center	8-18
Rectangular contour, 2 points	8-20
Circular contour, center	8-20
Circular contour, 2 points	8-21
Polygonal contour	8-21
Element contour	8-21
Inserting a Corner on a Poly Plate	8-24
Removing a Corner from the Poly Plate	8-24
Controlling the Object Visibility	8-25
Turning off the Visibility of the Selected Objects	8-26
Turning on the Visibility of All the Objects	8-26
Showing Only the Selected Objects	8-26
Turning off the Visibility of the Selected Assemblies	8-26
Showing Only the Selected Assemblies	8-27
Cycling through the Display Type of the Objects	8-27
Restoring the Standard Display Type of the Objects	8-27
Hands-On Tutorial (Struc/BIM)	8-28
Skill Evaluation	8-43
Class Test Questions	8-44
Chapter 9 - Extended Modeling and Productivity Tools	
Creating Cage Ladders	9-2
Creating Spiral Stairs	9-20
Inserting Wallrails	9-25
Selection Tools in the Advance Steel Tool Palette	9-28
Display connected objects	9-28
Clear marked objects	9-29
Select all marked objects	9-29
Display objects connected in shop	9-29
Display connection means	9-29
Remove marking + display connected objects	9-30
Remove marking + display objects connected in shop	9-30
Remove marking + display connection means	9-30
Creating Beam Cut Features	9-30
Creating Miter Cuts	9-30
Cutting at an Object	9-32
Manually Connecting Parts	9-34
Inserting a Rectangular Bolt Pattern using Two Points	9-35
Inserting a Rectangular Bolt Pattern using the Center Point	9-35
Inserting a Rectangular Bolt Pattern using the Corner Point	9-36

Inserting a Circular Bolt Pattern using the Center Point	9-36
Splitting Bolt Groups	9-37
Inserting a Weld Point	9-37
Inserting a Line of Weld	9-37
Adding Objects to an Existing Bolted or Welded Connection	9-37
Removing Objects from an Existing Bolted or Welded Connection	9-38
Switching the Connection Pattern Objects	9-38
Hands-On Tutorial (Struc/BIM)	9-40
Skill Evaluation	9-69
Class Test Questions	9-70

Chapter 10 - Adding Custom Connections and Profiles

Custom Connections	10-2
Inserting Plates Along the Beam Flange	10-3
Inserting Plates on the Beam Flange	10-5
Inserting Plates Parallel to the Beam Flange	10-5
Inserting Plates Along the Beam Web	10-7
Inserting Plates on the Beam Web	10-7
Inserting Plates Parallel to the Beam Web	10-7
Inserting Bolts on Beams	10-8
Inserting Bolts on Beam Gauge Line	10-10
Inserting Studs on the Beams	10-10
Inserting Galvanizing Holes	10-11
Inserting a Plate on an Existing Plate	10-13
Inserting a Plate Perpendicular to an Existing Plate	10-13
Inserting a Plate at an Edge of the Existing Plate	10-13
Creating Custom Connections	10-13
Inserting Custom Connections	10-22
Adding Custom Profiles to the Database	10-23
Hands-On Tutorial (Struc/BIM)	10-29
Skill Evaluation	10-57
Class Test Questions	10-58
Index	I-1
Answers to Skill Evaluation	A-1
